**“The Gateway”:**  
Entry road passes through the crescents of trees that surround the crescent shaped Tower of Voices (a year round accurate Islamic prayer time sundial). A line across the most obtruding tips of the Tower crescents (**aqua arrow**) points 1.8° north of Mecca, exactly replicating the near Mecca orientation of the half mile wide central crescent.

**Permanent entrance:**  
Off US 30 in western Pennsylvania (the Lincoln Highway).

**Red arrow** shows the path Flight 93 followed to ground. Where the flight path “breaks the circle” (at the end of the Entry Portal Walkway) sits the 44th memorial glass block on the flight path, matching the number of passengers, crew, AND terrorists. It defines a hidden exact Mecca-orientation of the giant crescent. (Swing the upper tip of the **aqua line** in 1.8° and it hits the end of the Entry Portal Walkway).

**Unnatural beauty:**  
Ponds created by strip mining.

**The “Crescent of Embrace”:**  
Face into the crescent to face Mecca. The superimposed **green circle** is from Islam.com. It shows the “qibla” direction (the direction to Mecca, which Muslims face for prayer) for Somerset PA (ten miles from the crash-site). Notice that if a person stands at the midpoint between the two most obtruding tips of the crescent structure (**aqua dot**) and faces into the center of the crescent (**aqua arrow**) he will be facing almost precisely in the qibla direction. This overt orientation of the crescent points slightly north of Mecca (1.8°).

**Temporary Entrance:**  
Skyline Rd, off Lambertsville Road.

**The Memorial Wall:** Has a separate upper section placed exactly as the star on an Islamic crescent and star flag. Three glass blocks on the upper wall mark the date: September 11, 2001. The date goes to the star on the Islamic flag. The date goes to the terrorists.

**Flight 93's point of impact.**

A crescent that Muslims face into to face Mecca is called a “mihrab” and is the central feature around which every mosque is built.

Minor cosmetic changes in the “Bowl of Embrace” redesign leave these and many other Islamic and terrorist memorializing features fully intact.

**The planned Flight 93 Memorial is a terrorist memorial mosque**
