

The 9/11 date will be placed in the exact position of the star on an Islamic crescent and star flag

This elevation view shows the Sacred Ground Plaza with its two part Memorial Wall as it will look from inside the giant crescent.

The separate upper section of Memorial Wall on the right is inscribed with the 9/11 date. It sits at the top of the Sacred Ground Plaza in the site-plan view below. Notice that the path that divides the Memorial Wall into two parts is visible in the site-plan view. It is highlighted in purple on the right, and can be see without obstruction on the left.

The separate upper section of Memorial Wall that sits above where the path comes through is highlighted in aqua in the right hand image, and is visible without obstruction in the left hand image. You can see just by looking that this upper section of memorial wall, inscribed with the 9/11 date, is centered on the bisector of the giant crescent, which is the exact position of the star on an Islamic crescent and star flag.

The date goes to the star on the Islamic flag. The 9/11 date goes to the terrorists.
