

Left image: a traditional Islamic sundial. The shadow has just reached the outer curved vertical, indicating time for Islamic afternoon prayers. The image on the right is the Tower of Voices part of the planned Flight 93 Memorial. Shadow calculations confirm that it is also an Islamic sundial. When the Tower shadow reaches the inner arc of trees, it will be time for Islamic afternoon prayers. The tower-minaret is one of many typical mosque features in the Crescent/Bowl of Embrace design, all realized on the same epic scale. The planned Flight 93 Memorial is a terrorist memorial mosque. Visit CrescentOfBetrayal.com for details.
